

# Village of Hines Creek Council Request for Decision (RFD)

Meeting:	Regular Council Meeting
Meeting Date:	May 22, 2018
Originated By:	Leanne Walmsley, Acting Chief Administrative Officer
Title:	Reports – End of Steel Museum Society Meeting May 11, 2018
File:	0904

## BACKGROUND/PROPOSAL:

The Village of Hines Creek was asked by the Museum board to attend their board meeting held on May 11, 2018. Discussion with Representative Josh Warkentin from WSP Canada on extensions to water/sewer lines from Museum to Village services.

Mayor Reintjes, Jason Cox, WTP operator and myself attended on behalf of Village.

### Water

Full service to washrooms

Water & Sewer to kitchen

Fire hydrant for fire protection

6" water line from across the highway. Bore under the highway

\$66,000.00.

Would have to be drained in the fall.

2" optional is from apartments along highway \$100,000.00 (could be optional for winter installation).

2" line would be adequate for kitchen/washrooms. 160 meters of line plus connection (\$30,000.00-35,000.00) casing might not be a necessity.

### Sewer

Permitting would be taken care of by WSP Canada. Usually around 10% of total costs of project. This could be a little more cost for this project.

Gravity feed system from museum is not a n option. No grade and they would need to pump it into sewer system.

Septic field – holding tank system. Direct pump out is not on the table.

Most expensive – crossing highway dumping into sewer \$70,000.00 – 80,000.00

Museum currently has a 1200 gallon holding tank for septic.

Single size than 46,000 liters is approximately \$7,000.00 for tank and hose.

Warkentin suggested a 2,000 gallon tank and sealant \$10,000.00 includes alarm system.

Size would need to be appropriate. Field system – suggested HAE Enterprises

Location and create a sand filter

Reclaim sewage on site

300' from property line and buildings

5c

RECOMMENDED ACTION:

That this Council receive the End of Steel Museum Society Meeting synopsis on water and sewer lines as information.
