

## Village of Hines Creek Council Request for Decision (RFD)

Meeting:	Regular Council Meeting
Meeting Date:	September 8, 2020
Originated By:	Kimberley Kuntz, Administrative Assistant
Title:	New Business – Fitness Center Lights
File:	0908

### BACKGROUND/PROPOSAL:

Our Fitness Center Facilitator has brought to our attention that lights and ceiling tiles are occasionally hit by basketballs at the fitness center when a ball bounces off the rim at the wrong angle.

Currently there are fluorescent hanging lights that could break if hit by a ball. The Village does have leftover LED lights from the lighting project that could be installed that would be flush with the ceiling. Which would potentially save the lights, but damage to the ceiling tiles is still a possibility.

Another option is to suspend a net above the basketball net to protect the lights and the tiles, public works estimates a 30'x 30' net would cover the required area.

OmniSport	\$680.40 (GST Included, shipping extra)
Airdrie Canvas	\$577.50 (GST Included, shipping extra)

### RECOMMENDED ACTION:

That Council discuss options and decided what needs done to protect the lights and ceiling tiles at the fitness center.

Hello,

We have sports netting that would work great for this application. For a 30 x 30 you are looking around \$550 plus GST

**Message**

Good afternoon,  
We're looking for a recommendation and quote for our fitness center. We are having issues where the occasional basketball is hitting our ceiling tiles and lights. We are thinking some netting about 30' x 30' suspended from behind the hoop and up to the ceiling would help. What product would you recommend?  
Thank you  
Kim Kuntz
